About Dr. Deeksha Tyagi

Dr. Deeksha Tyagi is a highly respected IVF & Infertility Imaging Expert with **32+ years of experience** supporting advanced fertility care. Her role lies at the critical intersection of precision imaging, reproductive diagnostics, and assisted reproductive technology (ART), helping intended parents make informed clinical decisions and manage infertility treatment.

She began her ART journey in Delhi and went on to receive advanced international training across Israel, Belgium, Germany, and Georgia, gaining exposure to some of the world's busiest and most advanced reproductive centres.

Her training includes a certificate course in ART from **Assuta Medical Center, Tel Aviv**, further specialisation at the **University of Brussels**, and hands-on ART and embryology training at the **Scandinavian IVF Centre, Georgia**.

At Zemya IVF & Fertility Clinics, Dr. Deeksha works **closely with the core IVF clinical team**, providing advanced fertility imaging, cycle monitoring, and diagnostic support that forms the backbone of individualized fertility management planning. Her expertise plays a vital role in optimising outcomes while minimising risks and complications.

Apart from her clinical excellence, she supports patients through holistic infertility management, including emotional and psychological care.
